and will be given us here if demanded
at the guild-hall. Local girls may also
be engaged for the service, but not for more than
one hour at a time. The sum remitted will be
one-half of the amount received by the
girls, and one-half will be retained by the
organizer.

ESTIMATING OPTIMUM PLANTATION SIZE In order to estimate optimum plantation size for maximum yield per unit area, it is necessary to know the relationship between yield and plantation size. This relationship can be expressed as follows:

2002-03-25: 10:00 AM - 10:30 AM
A short meeting was convened at the office of the
Chairman of the Board of Directors of the
University of Alberta, Dr. John McRae, to discuss
the proposed changes in the University's
regulations regarding the awarding of degrees.
